First Energy Crisis: Paleolithic era to Neolithic era

Trade and Ritual

By about 4,000 BC, people were beginning to settle in one place and build permanent shelters from stone. They grew barley and smaller wheat and used oxen.

new materials and acquire more possessions. They worked and fired clay in kilns to make pots and traded stone axe heads.

Technology, Trade and Ritual

Ritual

People's lives were closely linked to the land and this dependence on nature was reflected through ritual. People started to build temples, get natural resources and stone circles, aligned to landmarks. Rituals such as events, more sacrifices, and religious ceremonies were performed.

1. Stone tablets, found with human remains, Loughborough
2. Flint spearheads, found with human remains, Avebury
3. Carved stone ball, possibly of ritual importance, Avebury
4. Flint, found at Avebury
5. Flint, found at Avebury

As the winter wore on, people started to build huts or huts.

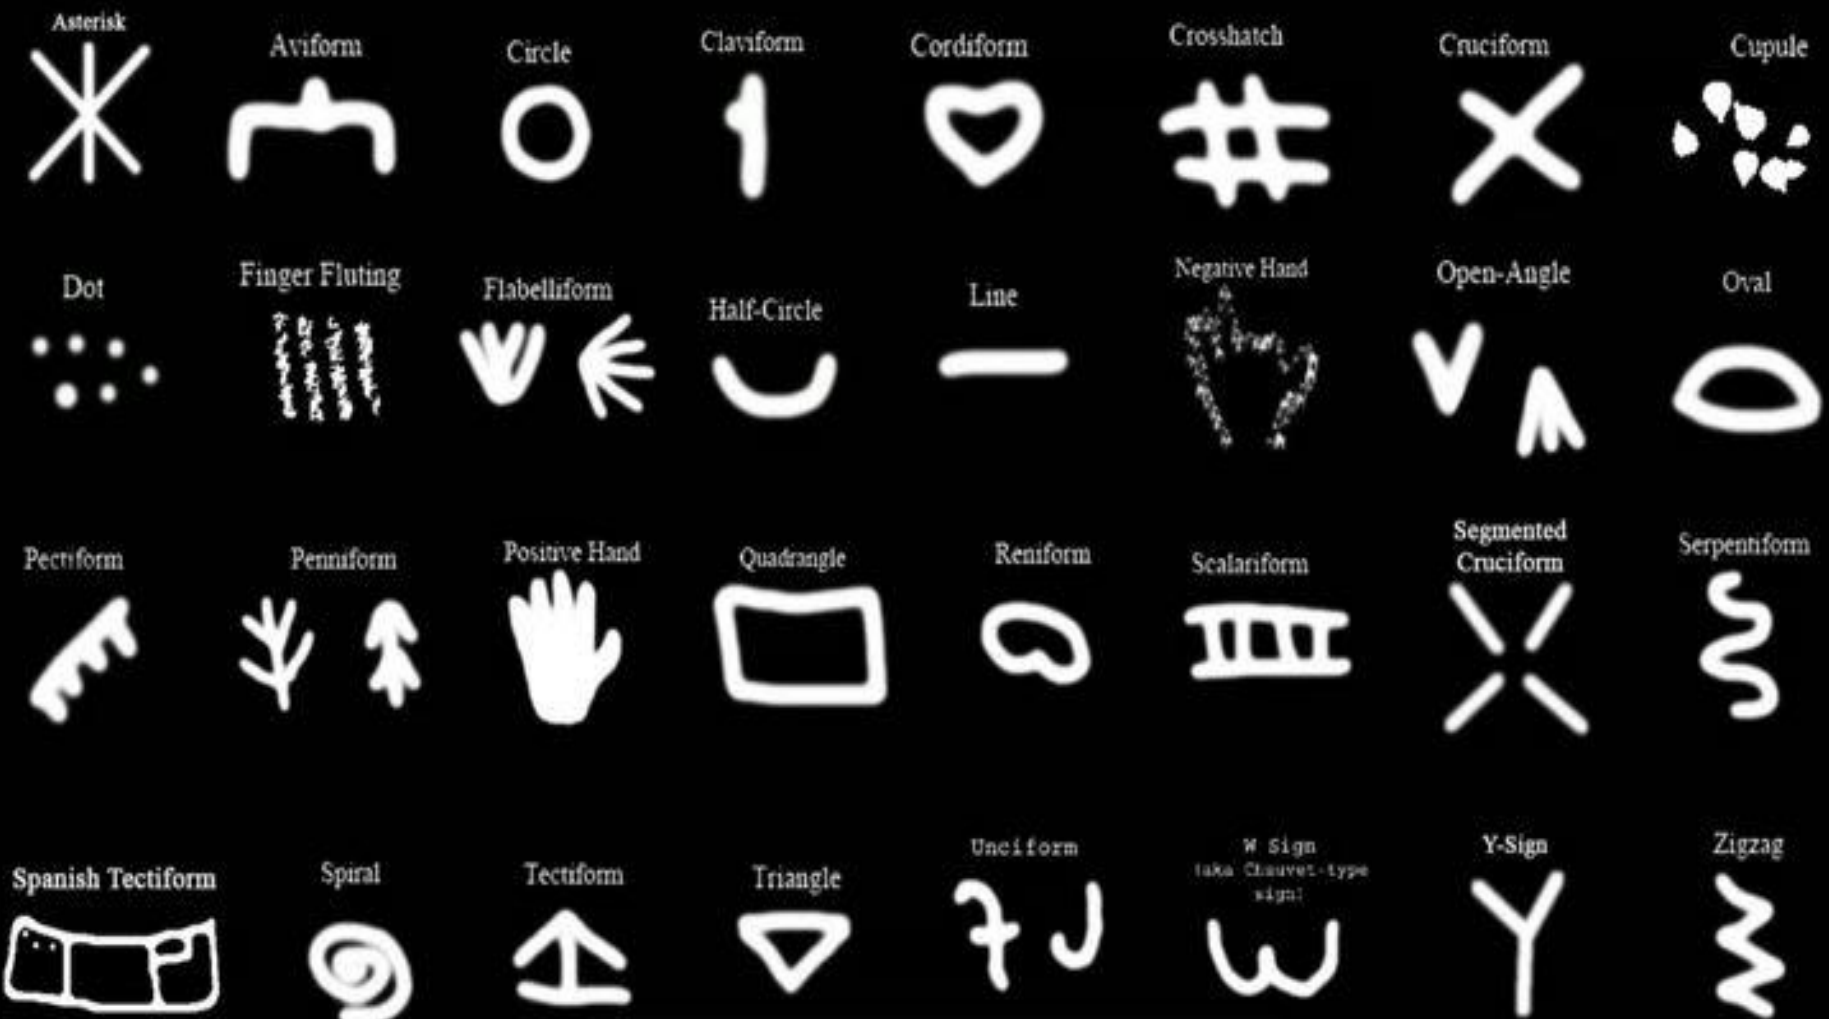

- People started to build huts or huts.
- People started to build huts or huts.
- People started to build huts or huts.
- People started to build huts or huts.
- People started to build huts or huts.
